Solapur, India

Computer Science Engineering graduate with internship experience in Software Development and DevOps, aligned to building and deploying applications for Trajectory Minds Software Solutions' Full Stack Developer Intern role. Hands-on experience with full lifecycle deployment using **AWS**, **Linux**, **Docker**, and **CI/CD** workflows, along with web application development collaboration and requirement analysis. Skilled in **React**, **Vue.js**, **Python**, and **FastAPI**, with practical exposure to AWS services (EC2, S3, IAM, VPC, RDS). Strong in communication, teamwork, problem-solving, and self-learning.

Python

React

Vue.js

FastAPI

AWS (EC2, S3, IAM, VPC, RDS)

Linux

Docker

Kubernetes

CI/CD Pipelines

GitHub Actions

Prompt Engineering

Microsoft Excel

Power BI

CI/CD

Backend + fast APIs

WORK EXPERIENCE

Junior DevOps Engineer-Two Elephants Technologies LLP

Mar 2026 - Aug 2026

- Collaborated with team members on the development of web-based applications.
- Assisted in designing user-friendly interfaces and improving user experience.
- Worked closely with project teams to understand business requirements and deliver solutions.
- Participated in project discussions, requirement analysis, and task execution.
- Developed skills in **deployment**, **teamwork**, **communication**, **time management**, and **problem-solving** in a professional environment.

Junior DevOps Engineer-Two Elephants Technologies LLP

Mar 2026 - Jul 2026

- Worked as a Junior Software Developer and Junior DevOps Engineer during internship.
- Gained hands-on experience in software development and **AWS cloud services**, **Linux**, and **Docker**.
- Performed deployment activities, configured cloud infrastructure, and **troubleshoot deployment issues**.
- Managed databases and built **automated CI/CD pipelines**.
- Worked with **EC2**, **RDS**, **S3**, **VPC**, **GitHub Actions**, **Docker**, **Vercel**, **Render**, and **Supabase**.

INTERSHIPS

Smart Attendance System Internal-Two Elephants Technologies LLP

4 Months

- Deployed and managed a web-based application using modern cloud and DevOps technologies.
- Handled application containerization using **Docker** and configured cloud infrastructure.
- Set up **CI/CD pipelines** and performed **troubleshooting** for deployment-related issues.
- Gained practical knowledge of **AWS services** including **EC2**, **VPC**, **RDS**, and **S3**.
- Worked on application deployment using **Vercel**, **Render**, and **Supabase**, along with **GitHub Actions** for automation.
- Developed understanding of **production deployment workflows**, cloud infrastructure, networking concepts, database management, and CI/CD.

PROJECTS

Smart Attendance System Internal

3 Months

- Focused on deploying and managing a web-based application using modern cloud and DevOps technologies.
- Performed the complete deployment process, including **application containerization with Docker**.

- Configured and managed **AWS cloud infrastructure** and set up **CI/CD pipelines**.
- **Troubleshoot deployment-related issues** during the project.
- Gained practical knowledge of **AWS services** such as **EC2, VPC, RDS, and S3**, and networking concepts.
- Learned application deployment using **Vercel, Render, and Supabase**, along with **GitHub Actions** for automation.
- Understood real-world **DevOps practices**, cloud infrastructure, networking, database management, CI/CD, and production deployment workflows.

Parallel E-commerce

- Worked as a Frontend and Backend Developer for the Parallel E-commerce project at Two Elephants Technologies LLP.

Tech-threads

- Built Tech-threads, a full-stack web application enabling users to create, share, edit, and interact with technical posts in **real time**.

EDUCATION

B.Tech / B.E. | Computer Science and Engineering (CSE)
Dr Babasaheb Ambedkar Technological University, Lonere
Grade - 7.9/10

2026

12th
Maharashtra, English
Marks - 55%

2022

10th
Maharashtra, English
Marks - 80%

2020
